# YOUR BUILD, OUR PASSION

---

## Every build needs a roof.

If you are using traditionally made bricks – why not choose roof tiles to match?

Our carefully curated range of handcrafted roof tiles are specially designed to complement our bricks. Conscientiously formed by expert tilers, each individual tile is truly unique.

We combine modern clay preparation methods and kiln technology with traditional manufacturing techniques to produce beautifully crafted tiles, that are available in a range of timeless colours. With a sandfaced texture, that offers an established, characterful look which will retain for decades to come.

Available in an array of colours; our products have natural variations in shape texture which will furnish your build with a traditional, established look.

Crafted by hand to create subtle blends, mellow shade variations and no harsh colour changes.

# ROOF TILES

## COALPORT AUTUMN
