Lead times are provided as a general guide and may vary based on availability and order volume.
Samples are provided for texture & colour purposes only & may vary in size from the finished product.

THE NATION'S FAVOURITE BUILDING MATERIAL

SPECIALIST HELP AND GUIDANCE

With over 150 years collective experience in the traditional brick industry, we are committed to providing all of our customers with the highest quality service and advice. With unrivalled knowledge of regional brick types, experience in dealing with planning permission and sensitive conservation area sites, our team will guide you every step of the way.

PROFESSIONAL EXPERTISE

Our team of experts are on hand to assist with all your brick related queries. We take pride in knowing our product and being able to offer a full, efficient service that is tailored exactly to your specifications.

ETHICAL AT EVERY STAGE

Imperial Bricks' products are made ethically to the highest international standards, confirmed by independent audits and robust product testing by recognised third-party bodies. We only partner with manufacturers who meet our ethical policies and business practices as outlined in our Imperial Standard.

TRADITIONAL MANUFACTURING

As experts in this industry, we know that the quality and character of traditional bricks cannot be achieved through mass production. We thrive on the little imperfections created during the manufacturing process, which make our bricks truly unique. Our manufacturing techniques perfectly replicate those used through the centuries, and we strive for all our bricks to reach the same level of quality and appearance.

HIGH VOLUME AVAILABILITY

We are the UK's largest supplier of traditionally manufactured bricks. Our offering includes handmade, wirecut and pressed bricks in imperial, metric, hybrid and linear sizes. With the capacity to deliver over 80 million bricks per annum, three UK storage depots and a dedicated logistics team, we can guarantee stock and delivery to fit your timescale.

BUILD BOLD WITH BRICK

CREATE PROJECTS THAT STAND OUT

We believe every great design begins with a strong foundation and a bold vision. Our brick collection is crafted for architects, builders, and homeowners who dare to think differently. Combining enduring strength with striking textures, rich tones, and tailored finishes, each brick range is designed to transform ordinary spaces into lasting statements.

It's important to remember that your choice of brick is an important one, unlike a kitchen, bathroom or carpets, you will never replace your brickwork. Kerb appeal is a huge selling point, and choosing the right brick for your project can help maximise value.

Whether shaping modern masterpieces or timeless classics, we invite you to explore materials that inspire creativity, elevate craftsmanship, and stand the test of time.

SANDSTRUCK

Soft clay is thrown into brick moulds lined with sand, giving each brick a distinctive creasing pattern. These bricks have irregular edges and usually feature a frog. They can also be produced in a solid format. Known for their strength and durability, sandstruck bricks have a distinctive finish and traditional look.

WATERSTRUCK

Waterstruck bricks use water as the mould releasing agent, which creates a softer, smoother, lightly textured finish. This finish is typically smooth to the touch and gently rippled or dimpled in appearance, which often have a more muted palette.

PRESSED

Machine-made pressed bricks use clay with a low water content that is passed through grinders and rollers before being forced into a mould. Pressed bricks are strong, dense and hard-wearing, with little to no texture and defined edges and corners, they often have a slight sheen that reflects its compacted structure.

EXTRUDED

An extruded bricks smooth, uniform appearance is achieved by compressing clay through a die and then cutting it to size with a wire. These bricks are also known as 'wirecuts,' and the result is a dense, machine-made brick that offers precision in size.

YOUR BUILD YOUR SIZE

THE ESSENTIAL DIMENSIONS

With many types and sizes of bricks available, it's important to understand which one best suits your requirements. Bricks are produced in a wide range of dimensions, and factors such as existing brickwork and design layout can play a significant role in determining the best brick choice for your project.

Standard brick dimensions often vary by region, with the modern standard size being 65 x 215 x 102.5mm. When accounting for mortar joints, these dimensions allow for consistent alignment and structural integrity across different bonding patterns.

Beyond these standard units, you might also encounter oversized bricks for larger commercial projects or thinner "brick slips" for decorative interior finishes and facade systems. Selecting the correct size not only ensures a cohesive aesthetic but also has an impact on the overall cost and efficiency of the construction process.

METRIC • 65 x 215 x 102.5mm

In 1965, the standardised metric brick was adopted. It is now widely used in contemporary buildings throughout the UK. The uniformity simplifies planning, ordering, and building processes, contributing to a streamlined workflow in the construction industry.

IMPERIAL • 68/73 x 228 x 108mm

Imperial-sized bricks measure between 68-73mm x 228mm (9 x 4½ x 3 inches) and were produced and used throughout the UK until the implementation of the metric system. Imperial sized bricks are usually a 'must' for renovating properties built before 1965 or recreating that traditional look.

HYBRID • 68/73 x 215 x 102.5mm

Designed to help bridge the gap between the old and the new, hybrid bricks have the advantages of imperial height but a metric width measurement. This means it can blend seamlessly in renovation, restoration or extension work in height, but it has the added ability to conform to modern building specifications for window and door lintels.

LINEAR • 50 x 327 x 102.5mm

Although not a new concept, these elongated bricks have existed since the Romans. Linear bricks now play an important part in contemporary construction and style. With available dimensions starting at 50 x 327 x 102.5mm, they create opportunities for exciting, powerful architecture and design statements.

CAMBRIDGE BUFF

Handmade buff yellow bricks with subtle colour variation and some pale pink tones.

EXCEPTIONAL MODERN ARCHITECTURAL FAMILY HOME

This family residence in Winchester is a remarkable example of modern architecture. The property was first built in the 1970s but was later renovated and extended, and now offers an up-to-date luxurious look.

The owners of the property increased its footprint with the addition of a rear and side extension, creating a modern open plan kitchen living area with bi-folding doors, leading to a beautifully landscaped garden.

The unique design by Anthony Munden Architects is emphasised by the use of our Cambridge Buff handmade bricks, which are characterised by yellow shades with subtle pale pink tones.

WEATHERED ORIGINAL LONDON STOCK

CONTEMPORARY WRAP AROUND EXTENSION WITH A CANTILVERED CORNER

The design by KJC Architects added a glazed extension to the rear of this London home, which created a light-filled kitchen and dining room that overlooks the garden. With bi-folding doors opening out onto the styled patio, the extension gives a true inside-outside feel.

The unique design of the home is emphasised by handmade bricks which are laid in stretcher bond, extended upwards into soldier bond. The bricks were also cut into brick slips and used internally for a feature wall which instantaneously provides a charming look.

The property boasts strong architectural features enhanced by materials which include bi-fold doors, timber and our Weathered Original London Stock bricks.

The bricks are a traditional yellow shade with an aged weathered finish, which captivates the appeal of the new rear façade.

RECLAMATION YELLOW STOCK

CODE	SIZE	TOLERANCE	PACK SIZE
HMSHD/YELLMUL/DUAL/65	65 x 215 x 102.5mm	T1/R1	650

WHAT IS DUAL FACED?

Dual faced is a unique 3-in-1 design, where each brick has one tonally weathered face and header, and the reverse side is left 'clean' with no weathering.

This allows bricks to be laid on site using either face, allowing the choice of creating all plain, all weathered or a custom mix of the faces to create a unique blend.

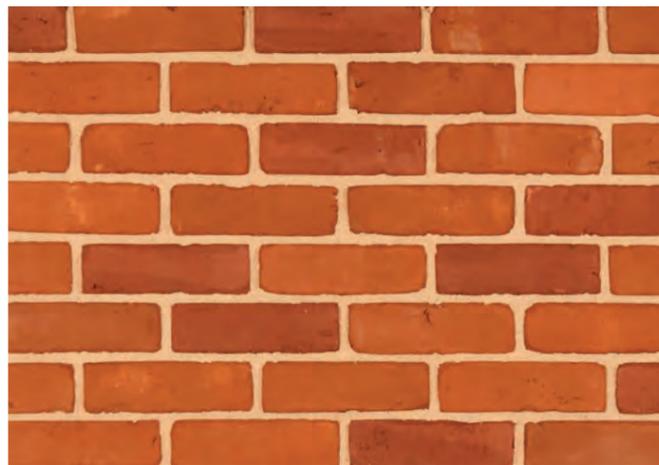

BOURTON ORANGE

Handmade orange bricks with a smooth texture, and subtle colour variations.

CODE	SIZE	TOLERANCE	PACK SIZE
HMBRORWS/VT/65	65 x 215 x 102.5mm	T1/R1	640

FARMHOUSE ORANGE

NEW BUILD MANOR HOUSE DESIGNED TO REPLICATE A LISTED BUILDING

The owners of this breath-taking property, originally decided to buy and restore a historical, derelict listed manor house located in Spalding.

Unfortunately, the initial plan for the Grade II listed estate fell through, but the owners fell in love with the property and decided to meticulously replicate it as a new build home, which looks precisely like the original building.

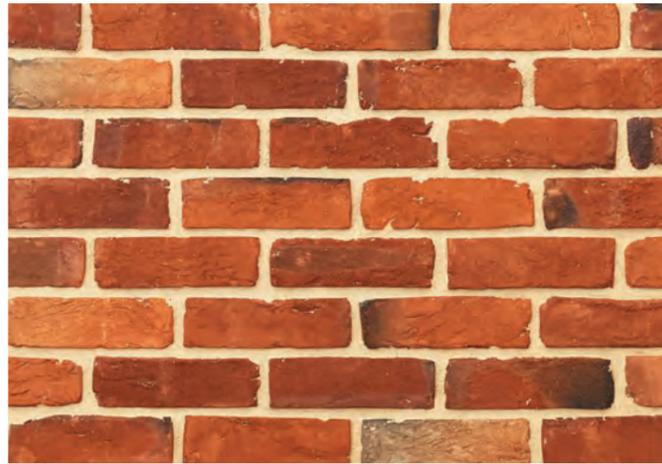

To capture the exquisiteness of the home, our brick match expert visited the listed house and created a unique specification for all the bricks and specials used. The brick specials in particular were templated to create bespoke moulds for the homeowners specific requirements. The self-build was intricately designed and built using Farmhouse Orange handmade bricks, laid using an English garden wall bond, highlighted with detailed brick arches, dentil courses, sash windows and roofing slates.

REGENCY ORANGE MULTI

Handmade bricks with a soft texture and natural creasing on the faces, featuring predominantly orange shades blended with some reds.

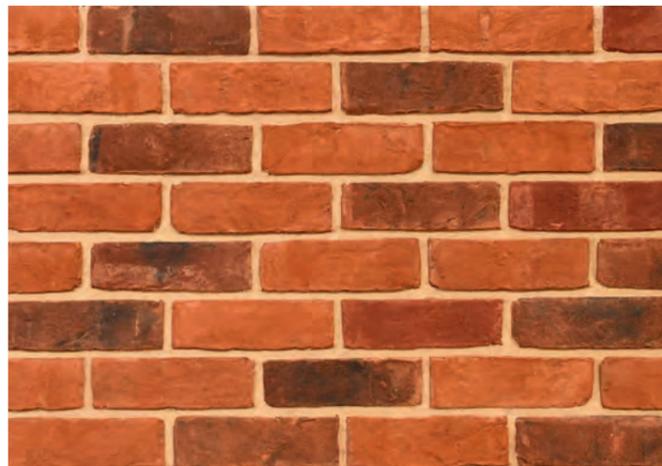

CODE	SIZE	TOLERANCE	PACK SIZE

URBAN WEATHERED

DEVELOPMENT OF FOUR PROPERTIES IN CHESHIRE

This remarkable development features two traditional barn properties, renovated using reclaimed bricks salvaged on-site, and two new builds which exude a mix of modern and traditional elements.

Our Urban Weathered bricks were selected for the build due to their close resemblance to the original bricks. The endearing nature of the homes, is accentuated with traditional roofing slates, and dark wooden windows and doors.

The aged look of the bricks is achieved by weathering our red traditional handmade bricks, which instantaneously adds an alluring appeal to the exterior of the properties.

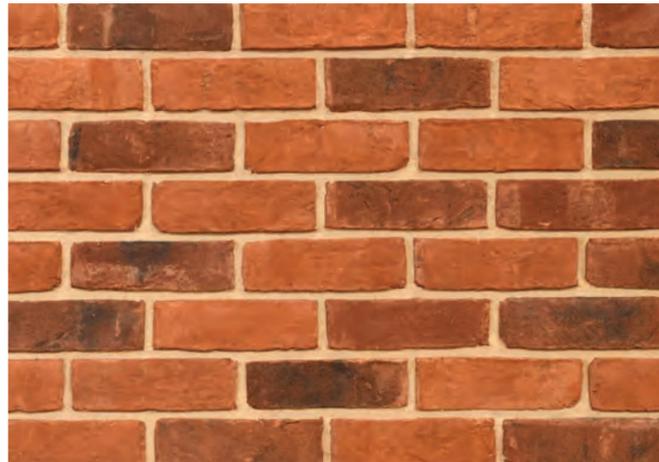

REGENCY RED MULTI

Soft textured handmade bricks with natural creasing on the faces, featuring predominantly red shades blended with some oranges.

CHARACTERFUL EXTENSION AND RENOVATION CREATES FUNCTIONAL LIVING SPACE

This magnificent five bedroom detached Victorian home was originally constructed with poor craftsmanship, and required a full renovation and extension to transform the house into a working and contemporary living space for a growing family.

The design by Grafted breathes new life into the property, featuring a stylish open-plan kitchen and dining area. The architecture of this home creates an impressive blend of modern and Victorian elements including timber, glass, and handcrafted coal-fired bricks.

To ensure a seamless match to the original building, our Soft Red handmade bricks were selected, proving to be an ideal match.

The bricks feature characterful multi red shades which instantly enhances the property's kerb appeal.

LUXURIOUS NEW BUILD INCORPORATES TRADITIONAL CHARACTER

The owners of this phenomenal property wanted to create a quintessential living space that integrated contemporary and traditional Edwardian architecture.

Snell-David Architects approached us on behalf of their client who sought a tailor-made brick. Our experts manufactured a bespoke blend, which was laid in an English Cross bond, giving this home a unique identity.

The property features a triple garage and beautifully landscaped gardens that overlook University playing fields.

The bespoke bricks features multi shade variations and natural creasing on the faces, which add instant kerb appeal.

OLD SAXON: PREMIUM WATERSTRUCK BRICKS

BRICKS BORN FROM TRADITION, ENGINEERED FOR TODAY

The waterstruck method is one of the oldest and most revered techniques in British brickmaking. Where other production methods use sand as a releasing agent, the waterstruck process uses water to free the wet clay from its mould. The result is a brick with an undulating surface, characterised by soft creasing, a natural colour palette and a muted patina.

Launching with five carefully curated colourways, each reflecting a distinct regional and aesthetic tradition within the UK's rich brickmaking heritage, the Old Saxon range captures these qualities in a brick that is dimensionally consistent, structurally reliable, and fully compatible with modern building systems.

OLD SAXON RED

Characterful traditional red waterstruck bricks.

CODE	SIZE	TOLERANCE	PACK SIZE
WSSAXONRED/LK/65	65 x 215 x 102.5mm	T1/R1	550

OLD SAXON RED MULTI

Finely textured waterstruck bricks featuring a blend of red shades.

WSSAXONBUFF/LK/65	65 x 215 x 102.5mm	T1/R1	550

OLD SAXON GREY

Premium waterstruck bricks featuring a sleek flat grey finish.

CODE	SIZE	TOLERANCE	PACK SIZE
WSSAXONGREY/LK/65	65 x 215 x 102.5mm	T1/R1	550

FAQ

REGIONAL BRICKWORK?

Across the UK, regional brickwork reflects local character and heritage, from the warm red and russet tones of traditional clay bricks in the Midlands, to the soft yellow stocks of London, and the pale buff and sandstone hues found throughout the Cotswolds. In the North, deeper reds and blue engineering bricks are common, particularly in historic industrial cities like Manchester. While these regional styles offer timeless inspiration, today's architecture can also embrace out-of-the-box choices mixing colours, textures, and finishes to create something entirely distinctive.

WHAT ARE DUAL FACED BRICKS?

Dual faced (DF) is a unique 3-in-1 design, where each brick has one tonally weathered face and header, and the reverse side is left 'clean' with no weathering. This allows bricks to be laid on site using either face, allowing the choice of creating all plain, all weathered or a custom mix of the faces to create a unique blend.

WHAT IS A RECLAMATION FINISH?

Sometimes projects call for a heritage aesthetic, whether this is for personal preference or planning stipulations. While utilising genuine reclaimed brick is one option, Imperial can offer a solution for your project that gives the look and feel of reclaimed bricks, but produced using modern techniques. All our bricks come fully tested and certified to British Standards. We have a full range of bricks that replicate the traditional qualities of heritage bricks by utilising tumbling, tinting and weathering processes.

WHAT IS A BRICK SLIP?

Brick slips offer a cost effective way to achieve the same appearance as standard brickwork. Benefitting from the durability and longevity of bricks, they offer a quick and easy installation process and are available to be fabricated with dovetail and chamberlain fixtures for external cladding systems. They are also widely used in prefabricated components such as chimneys and arches. Imperial offers our entire range as brick slips, cut to order at our headquarters in the heart of Shropshire, where we can work closely with you to produce bespoke solutions and bring ideas from conception to reality.

HOW DO WE STACK UP?

All of our manufacturing partners must meet and evidence at least four of the key internationally recognised standards for product quality, sustainability and ethical supply.

We are able to stipulate and develop these high standards thanks to the long-term, exclusive trading relationships established with our global partners.

We have worked with these manufacturers over several years, so our customers throughout the supply chain – architects, merchants, specifiers, builders, developers and end users can be confident our bricks are made ethically, to the highest quality and reliably supplied.

We are proud to be independently audited ensuring transparency and traceability throughout the production process.
